

Newsletter 02/19

August 2019

Dear donors, supporters and volunteers,

This year's monsoon rain is coming to an end, soon the construction of our large project, the health center in Khorlabesi can be started.

We are facing a very big challenge! The plans are signed, the construction land (3'000 m<sup>2</sup>) is provided by the government and the contracts and intentions have been negotiated.

Much help is provided by our association in the coming years, especially in the medical field.

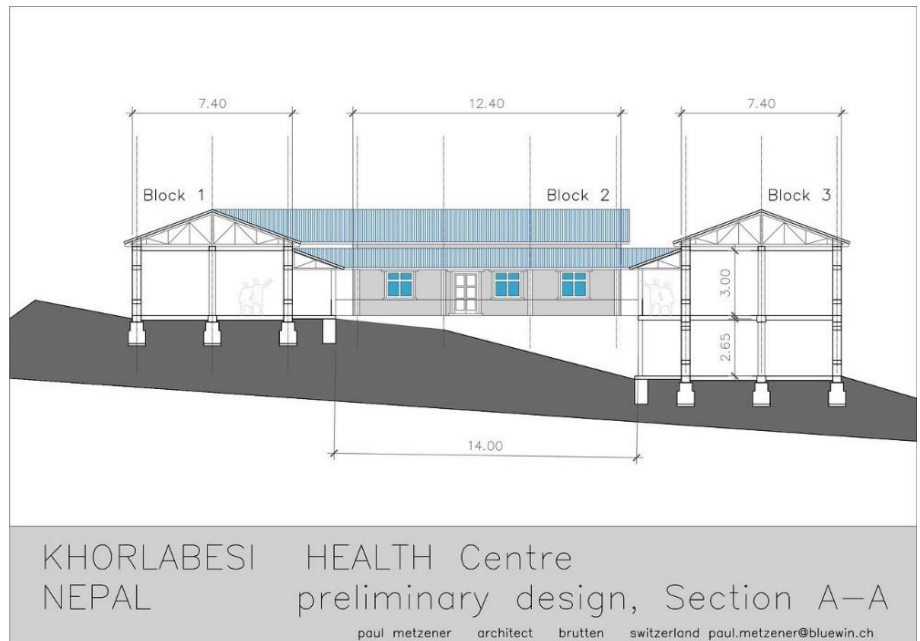

In late autumn there will be another team of doctors on site. The smaller health post in Patalekharka can then already be being opened too.

Transparent cooperation with the authorities is important for the realisation and operation of such clinics. We maintain good contact with those responsible in politics. The goals are implemented in a collegial and cooperative manner.

Who would have thought that we would one day be able to realize a construction for the medical care of the mountain population in the Himalayas? We are convinced that the planned infrastructure is an absolutely meaningful investment.

The construction time of the center with 4 new buildings takes about 18 months. It will then cover an area of over 650km<sup>2</sup>, up to the border to Tibet, currently there is no doctor in this region!

We are happy to inform you in more detail on our homepage [www.earth-c-air.com](http://www.earth-c-air.com) or personally.

Such big challenges can only be realized sustainably with an honorary, passionate team, with a lot of perseverance, as well as donations and financial support.

**Thank you very much for your trust and your valuable support!**

Namaste und vielen Dank! Merci! Grazie! Thank you!
